

REVIEW OF ADMINISTRATION OF PROPERTY BASED CONCESSIONS

Update Report

- As reported to the previous Forum meeting, a review of the administrative arrangements currently in place across State Government in relation to property-based State concessions is in progress.
- The objective of the review is to:
Review and recommend a costed, comprehensive, streamlined and efficient administrative system for the management of State property-based concessions for self-funded retirees, pensioners and other beneficiaries.
- The project is being managed by a working party comprising representatives of the relevant State agencies, the Local Government Association, South Australian Community Housing Council, and South Australian Institute of Rate Administrators.
- The Working Party has engaged consultants (KPMG) to assist the review.
- Consultation has now been completed with relevant stakeholders and the gap analysis is currently in progress.
- Achievements planned for the next phase are preparation of the draft report and relevant consideration by the working party.
